

The Collins Foundation Press is pleased to present

There’s a compelling new narrative for the world—a scientific cosmological story. *Becoming Intimate with the Earth* invites you to live *inside* this narrative, to embrace the blessing as well as the shadow of modern culture. Part love story, part battle cry, part call to adventure, it seamlessly weaves together

our new cosmology, the traditional wisdom of indigenous people, and an artist’s passionate engagement with life.

Pauline Le Bel is a masterful storyteller, award-winning novelist and Emmy-nominated screenwriter. She is also a professional singer and a provocative keynote speaker. Her passion and life's work is the integration of music, science, nature and spirit for the benefit of the entire Earth Family.
